I will circulate the ppt later this week for your review. Here is an outline:

- Why the Uinta Basin is important to EPA Region 8
- Current ozone design values and regulatory monitors
- Tribal interests
- State and federal permitting programs
- Significant new source issues, e.g. Deseret
- Proposed FIP for existing sources
- Winter ozone field studies
- Ozone modeling for NAAQS attainment
- Uinta Basin modeling currently available
- Background ozone
- NEPA activities
